

TESTIMONY OF HENRY DUNNE
STUDENT, CAPITOL HILL MONTESSORI AT LOGAN
April 14, 2016

Thank you for listening today. My name is Henry Dunne and I go to Capitol Hill Montessori at Logan and I am in 3rd grade in Ms Lowery's class. I also live in Ward 6.

I like my school because it is Montessori. I like Montessori because we get to be taught separately, we can learn at our own speed, we get to choose what we learn, and we get to stay with our teacher longer.

I would like you to give more money to our school for windows and more. The windows are old and yellow, and I can't see through them. Most of the children would like to see outside.

The temperature gets up to 78. I know this by taking the temperature. This is important because we get uncomfortable in the heat.

Most of the clocks are broken. This is important because if someone needed to leave early, they would not know when to leave.

Paint comes off the wall. This is important because we want our school to be clean.

Lead come out of the water fountains. This is Important because lead can damage your brain.

Thank you for letting me speak today.
